## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper® is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

Sometimes you need more than a retractor to protect your tool or instrument. Gear Keeper® offers an extended line of both retracting and non-retracting tethering systems:

**Gear Keeper® Shoulder Straps** offer a comfortable strap system with the exclusive **Gear Slide** feature — your device can move on the shoulder strap without the shoulder strap moving on your body. It also features the exclusive **Q/C-II connector system** so that your devices can be connected to either a Gear Keeper® Retractor or Shoulder Strap without changing the attachment mechanism.

The **Shoulder Strap / Retractor combo** offers a shoulder strapping attachment system with the added flexibility of a Retractor, allowing the instrument or device to be extended from the body.

The **New Heavy Tool Tethers** offer a protective lanyard system for tools up to 15 pounds. They provide a supple, low-profile coil system that minimizes the possibility of entanglement, allows full-arms reach and tool use without any adverse retraction force. The coil is enclosed in tough nylon webbing to provide strength and added safety.

They're ideal for working at heights with heavy tools; preventing tool damage or personal injury. The Gear Keeper® Heavy Tool Tethers are available in **Personal Attachment** models and **Bucket Attachment** models.

**Side-Release** models provide a method for easily exchanging one tool for another on the tether.

■ **Small Coil Version Provides Low Profile Personal Attachment**

■ **Provides Full-Arms Reach without Resistance**

■ **Non-Conductive Model has Side Release Lanyard for Easy Tool Change**

■ **High Strength Nylon Webbing w/ Self-Retracting Inner Coil**

■ **Large Coil Version Provides Full Extension Working in a Lift Bucket**

■ **Available in Multiple End Types: Load-Bearing Carabiners Fixed Lanyards Side-Release Lanyards**

**Grab your gear, use it, let it go — it retracts back every time!**

Gear Keeper makes whatever you're doing easier while preventing loss or damage to your valuable gear.
